- 📍 Montreal, Quebec, CANADA

Achievements

Co-curricular

- **Winners in State level Hackathon(AZADI KA AMRIT MOHOTSAV).**
- **Top 12 Finalist in HackX National level hackathon**
- **4rd Rank** in Codepie 3.0, college-level competitive programming contest out of **200+ participating teams.**

Positions Held

- **Vice-President** GSA concordia
- Executive College Council Body Memeber. Representing my department at university level.
- Student Coordinator **MLDAG** (Machine Learning and Data Analysis Group) .
- Student Coordinator **AI/ML Club.**

Teaching Assistant

- Teaching Assistant – Data Structures (Concordia University)
- Undergraduate Student Fellowship Scheme(UGSF)

CO-FOUNDER

- MVP

MVP, Missionary Visionary Products, founded in 2023 with a visionary mission. Our goal has always been to provide innovative and transformative products to people around the world.

- **MLDAG (Machine Learning and Data Analysis Group)**

Spearheaded a research-focused group specializing in Machine Learning, Deep Learning, and Big Data Analytics, with a focus on high-impact areas like Xtreme Label Classification and Recommendation Systems.

Education

Masters - Computer Science	2024 - 2026
Concordia University Montreal, Quebec, Canada	GPA: -3.3
B. Tech - Computer Science & Engineering	2020 - 2024
Charusat University Changa, Gujarat, India	CGPA - 9.5

Projects

Real Time OCR for Partially Blind (Patent Pending)

- lot device that will help partially blind people to read written text.
- Coverts text-to-audio.
- Translates the text to other languages(English to Hindi, Gujarati etc.)
- Received funds of 50k from i-Create and 50k from CSIC.
- Incubated in i-hub Gujarat (**funded by the Government of Gujarat**).
- Part of Vibrant Gujarat Startup Exhibition.

Smart Mark Sheet Scanner 🔗

- Winner project in AZADI KA AMRIT MOHOTSAV (State-level hackathon).
- Finalist Project in HackX National-level hackathon.
- Developed a cutting-edge tool to automate and streamline the marksheet scanning process.
- Reduced the required workforce by **50-60%** by significantly decreasing the need for manual data entry.
- Achieved nearly **100%** accuracy across the system pipeline by implementing multiple checking and confirmation points.

Crowd Counting 🔗

- Increased the confidence accuracy upto 90%
- Real-time monitoring or surveillance service,
- Analysis of data of people at public events, for security purposes, etc.

Research

Research Internship (IIT Bhubaneshwar)

- Completed a research internship under Prof. Ganapati Panada, focusing on deep learning techniques.
- Worked on developing a new and fast deep learning method for detecting ECG signals.
- Coded and simulated the entire method from scratch, resulting in a faster and more accurate way to detect heart diseases using ECG signals.

WORK

3-Fit Internship (Start-Up) 2022

- Did research on competitive apps in similar domain to gain their pros and cons.
- Worked with different APIs

Skills

- Proficient in Python and Java, with strong experience in building scalable and efficient applications
- Advanced knowledge of Computer Vision, including model development and real-world implementation
- Hands-on expertise in YOLO (You Only Look Once) for object detection and image analysis tasks
- Strong experience with OCR technologies, including text extraction, preprocessing, and optimization
- Deep understanding of Machine Learning and Artificial Intelligence, including model training, evaluation, and deployment
- Experience working with data structures, algorithms, and performance optimization
